DETAILED ACTION

Reason for Allowance

The following is an examiner's statement of reasons for allowance: The prior art fail to teach or suggest a generally oval battery having a generally oval cross section, a generally oval sealing plate including a pair of linear parts opposite each other and a pair of circular parts opposite each other forming a generally oval shape and forming four locations where the linear parts join the circular parts and the shape of the sealing plate changes from a circular part to a linear part and from a linear part to a circular part, and an electrode plate assembly the sealing plate havening a Ushaped cross section, and the battery having a thickness of 4mm or more and a aspect ratio of 3 or more, wherein the four locations where the shape of the battery case changes form a circular part to a linear part or from a linear part to a circular part in an interface between the battery case and the sealing plate act as points where breakage occurs for discharge of gas. The combination of these elements work together to provide the superior resulting battery and do not merely perform the function the each element performs separately.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
